Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species I, the embodiment wherein the system is used within advertising and the content of the advertising environment.

Species II, the embodiment wherein the system is used within a telecommunication or Internet environment.

Species III, the embodiment wherein the system is used within mail/package carriers environment.

Species IV, the embodiment wherein the system is used within a game, play or movie environment.

Species V, the embodiment wherein the system is used within television signal environment.

Species VI, the embodiment wherein the system is used within parking/garage environment.

Species VII, the embodiment wherein the system is used within lottery ticket environment.

Species VIII, the embodiment wherein the system is used within municipal, state, or federal levies, fines or utility charge environment.

The species are independent or distinct because they are mutually exclusive as indicated within disclosure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require at least different field of text searches (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 3609

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
